THIS BOX IS EMPTY!
I'LL TRY ANOTHER!

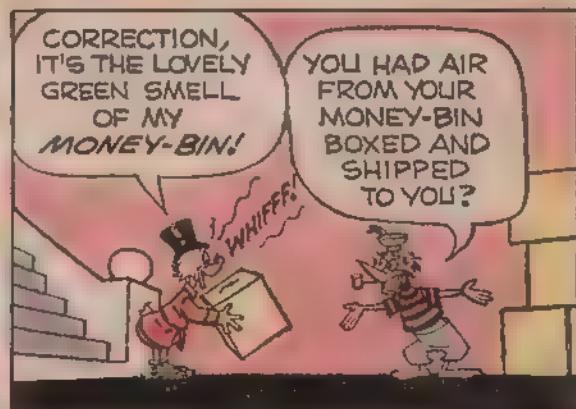

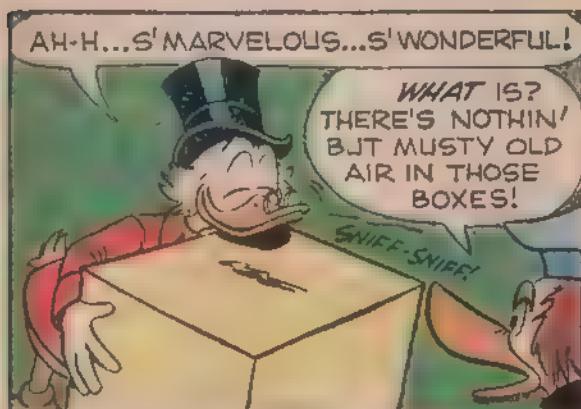

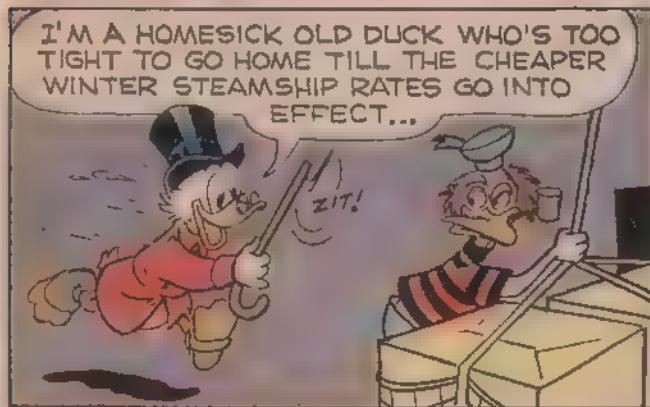

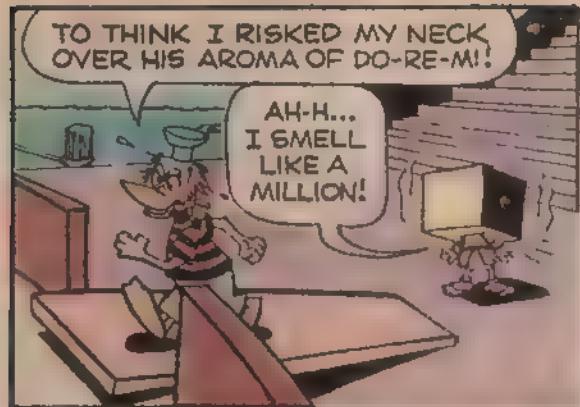

EVERY BOX IS AS LIGHT AS AIR!

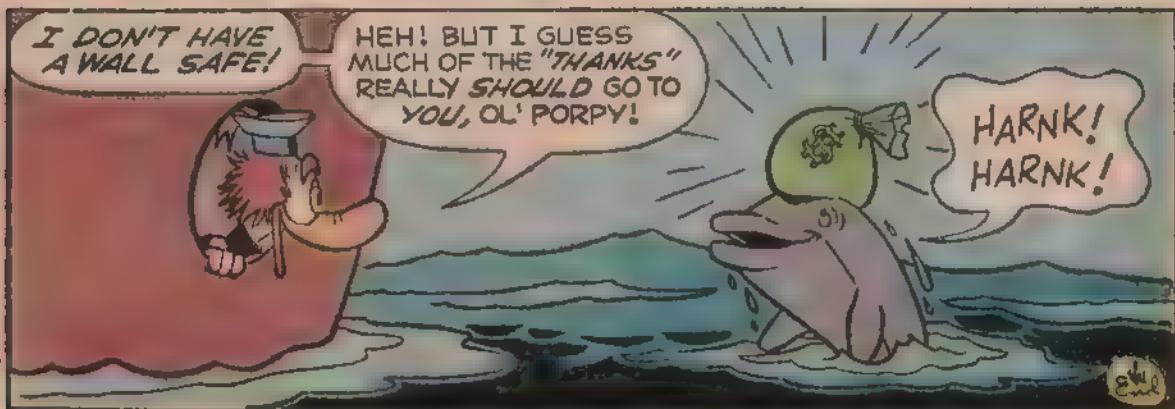

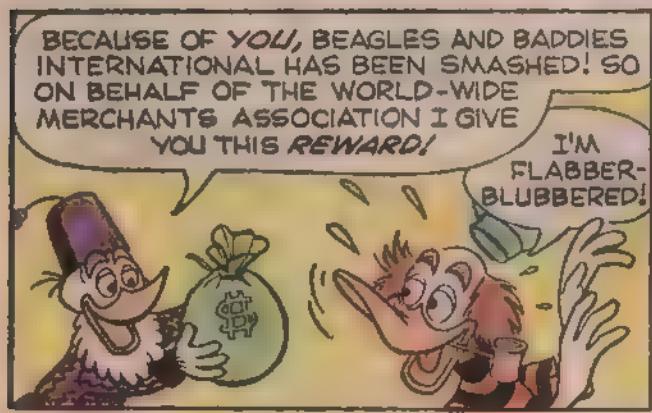

BUT AT THE PORT OF ISTANDUPP
AS MOBY TAKES ON HIS
CONTRACTED CARGO...

KEYS OF KNOWLEDGE

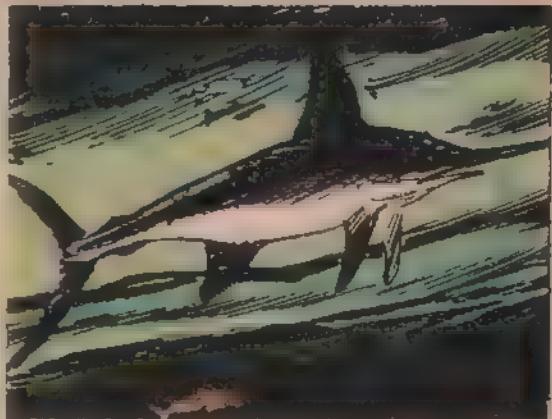

SWORDFISH

Swordfish weigh as much as 1000 lbs. and reach lengths of 15 feet. They are found in warm waters throughout the world.

The Swordfish is considered by big game anglers to be the world's greatest game fish. It has pluck, cleverness, speed and size.

Nature equips the Swordfish with a sharp bill, which serves as a formidable weapon. If it breaks off, the fish is defenseless.

After gorging themselves on mackerel, herring, flying fish or squid, they sleep in the sun with their tail and dorsal fin showing.

Caught with line or by harpoon, he's a real fighter. An enraged swordfish can shatter the heavy planking of a boat's hull.

PICTURE DICTIONARY

HAND

"All hands on deck."

Jest for Fun

Father: Why are you always at the bottom of the class?

Son: It doesn't matter, Dad. They teach the same thing at both ends.

Mother (phoning storekeeper): I sent my boy for two pounds of cookies, but you only sent a pound.

Storekeeper: My scales are all right—have you weighed your boy?

Diner: Waiter, that object in my soup looks like a cufflink.

Waiter: Thank you, sir, I've been looking all over for it.

Driving Instructor: After parking your car, you must always remember to put on the brake.

Lady Beginner: But I thought it came with the car.

Office Boy: Why is the boss yelling so loudly?

Secretary: He's talking to a customer in Paris.

Office Boy: Well, why doesn't he use the telephone?

Teacher: What is one-half of one-eighth?

Pupil: I don't really know, but it can't be very much.

Visiting Aunt: Well, Larry, what are you going to give your little brother this Christmas?

Larry: I don't know yet — last year I gave him the measles.

Science Teacher: Jones, what is a nitrate?

Jones: A telegram that's cheaper than a day rate.

Hotel Clerk: Breakfast is served between 7 and 10, lunch between 12 and 3 and dinner between 5 and 10.

Visitor: That doesn't leave me much time to see the town.

Riddle: What is the largest room in the world?

Answer: The room for improvement.

Mother: Young man, there were three pieces of cake in the pantry and now there's only one. Can you explain that?

Son: It was so dark in there I didn't see the other piece.

Visitor from city: Is that bull safe?

Farmer: He's a lot safer than you are right now.

Teacher: Johnny, will you tell us about the Battle of Bunker Hill?

Johnny: Well, it wasn't fought on the level.

Riddle: Why does a room get larger when people enter it?

Answer: Because there are more feet in it.

Dad: Son, everytime a boy is naughty he gives his father a gray hair.

Son: Gosh, you must have been a terror — grandpa's hair is all gray.

Angry Diner: Waiter, this food is terrible. Tell the chef I want to see him.

Waiter: It's no use — he won't eat it either.

Riddle: What did the farmer do when he slipped off the barn?

Answer: He hit the hay.

Office Manager: The man we want to hire must be responsible.

Young Man: I'm your man. Whenever something went wrong in the place I worked before, I was responsible.

Riddle: What part of a fish weighs the most?

Answer: The scales.

Art Patron: What a realistic painting. It makes my mouth water.

Artist: How can a sunset make your mouth water?

Art Patron: Oh, I thought it was a fried egg

DINOSAURIA

BRACHIOSAURUS

Some hundred million years ago, this huge fifty-ton dinosaur lived in and by the swamps of the prehistoric world. Measuring over eighty feet from nose to tail, with its great neck, it towered over forty feet high! Its tremendous legs were shorter in back, letting the tail and rear sink down as it progressed. Because of water's natural buoyancy, the giant dinosaur was able to move about easily in swamps, its tail helping to propel it along. The Latin name for this bulky dinosaur means "arm lizard."

The brachiosaurus' elevated nostrils permitted it to breathe with its head just above the surface of the water.

Hatched from an egg weighing about a mere two pounds, by maturity the brachiosaurus' weight increased 50,000 times and its length 60-fold.
